Contact: Dr. Edgar O. Oviedo-Rondón, North Carolina State University edgar_oviedo@ncsu.edu

September 2 Register in advance for this webinar [here](#).

Moisture Control Strategies for Better Paws and Drier Litter

Dr. Connie Mou, Jones-Hamilton

Connie received a Master's in Poultry Nutrition from Virginia Tech and a Ph.D. in Poultry Environmental Management from the University of Georgia. Her main area of focus is utilizing sensor technology to assess poultry house environments, assessing bird performance/behavior through bird water usage, and evaluating litter management strategies.

Brooding- The Most Important Stage

David Swysgood, Aviagen

David holds a BS in Animal Science from Missouri State University. He joined Aviagen in 1999 as a North America Technical Manager working with both Breeder and Broiler Management. David has over 30 years of experience in the integrated broiler and primary breeding industries.

September 9

Litter Management During Downtime

Dr. Josh Payne, Jones-Hamilton

Josh serves as the Technical Services Manager for Jones-Hamilton, the manufacturers of PLT®. He was previously an assistant professor and Extension Poultry Specialist at Oklahoma State University. Josh has extensive experience in litter management and poultry mortality management.

Post Brooding- Now What?

David Swysgood, Aviagen

September 23

Integrated Litter Management Plan for Large ABF Broilers

Dr. Trisha Marsh Johnson, DVM, MAM, Jones-Hamilton

Trisha is the Senior Manager, Veterinary Services for Jones-Hamilton. Early in her career, Dr. Johnson worked on the initial development and introduction of PLT® litter acidifier to the poultry industry. She then launched her own international veterinary consulting practice, Veterinary & Environmental Technical Solutions assisting poultry integrators in litter management, food safety, and transitioning to ABF programs. After 15 years in private practice, she returned to Jones-Hamilton in January 2020.

Ventilation: Placement to Market

Randy Kivett, Cobb Vantress

Randy joined Cobb in 2017 after 37 years working in the broiler industry in diverse positions of the chain. Randy is in charge of troubleshooting with customers to find real-world solutions that will improve broiler performance and help our products reach their genetic potential. Randy visits customers in the U.S., Mexico, Central America and Canada for technical support in all facets of live production
